

PRINTERnet

X MARKS THE SPOT OF EFFICIENCY.

ONLINE JOB SUBMISSION AND PROOFING SOLUTION

Features and Benefits

➤ Online Job Submission

Submit jobs via the web

➤ Online Job Proofing

RIPed and screened PDF Proofs returned automatically for customer review

➤ Integrated preflighting

Automatically preflight PDFs and delivers a preflight report to the customer

➤ Automated Notification

Automatic email notifications enhances feedback for customers and prepress production staff

➤ Workflow Integration

Integrates with Xitron's Navigator GPS and Xenith as well as other popular workflow solutions

➤ Expandable

Support for additional concurrent users

➤ Integrated PDF Option

Automatically creates certified PDF files from submitted PDF or postscript files

PRINTERnet Details

Online Job Submission and Proofing

PRINTERnet establishes a stronger link between printers and their clients. Job submission is easier, faster and more automated. The system accepts jobs, preflights them and delivers a status report to the client. Once a job passes preflight, a rasterized soft proof is automatically sent to the sender. PRINTERnet is able to accommodate job submission 24 hours a day!

Automatic Job Ticketing

PRINTERnet provides a simple user interface where basic job ticket information is entered by the client. This information is then submitted along with the job to your CSR or prepress department.

Integrated Preflight

Automated preflight, based on the industry standard Enfocus library, is performed automatically by PRINTERnet. A preflight report is generated and delivered back to the client. If the file fails preflight, your customer will be able to see where the errors occurred, make corrections and submit an updated file.

The screenshot shows the 'Edit Job Ticket' interface. At the top, there's a navigation bar with 'HOME COMPANIES CLIENTS ADMINISTRATORS F.A.Q. HELP ABOUT LOGOUT'. Below that, the 'Job Ticket Form' is displayed with various input fields and dropdown menus. Fields include 'Job Name', 'File Type', 'Number of copies', 'Binding style', 'Document size', 'Width', 'Colors Used', 'Type of Printing', 'Due Date', 'Type of Proof', '2-sided printing', 'Height', 'List spot colors', 'Paper Stock', 'Shipping/Special Instructions', 'Job Name', and 'Your Name'. A 'Save Job Ticket' button is located at the bottom of the form. On the right side, there's a sidebar with 'Jobs' (add job, upload file, job list) and 'Resources' (Settings).

Automated Notifications

Automated email notifications may be setup to notify the customer and prepress department with the progress of the job as it goes through PRINTERnet. The notifications help to keep the job flowing with minimal intervention of your CSR or prepress department.

Proof Annotation

PRINTERnet allows clients to annotate directly to the online proof and submit the proof, along with their annotations, back to the prepress department for review and updating.

Workflow Integration

PRINTERnet is designed to integrate with Xitron's Navigator GPS and Xenith workflow solutions. In addition to Xitron's own workflow solutions, PRINTERnet also integrates with most of the popular workflow solutions on the market today via the PRINTERnet Connect option.

Expandable

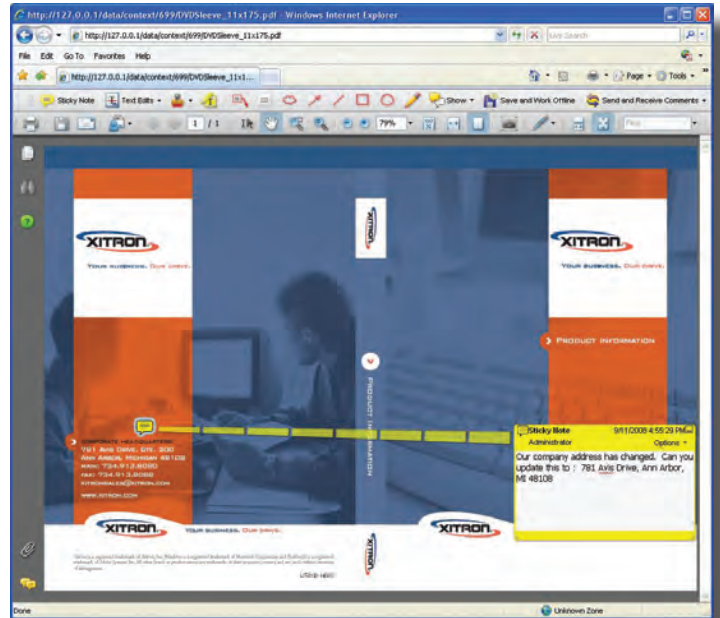

PRINTERnet solutions include capabilities for up to four (4) concurrent users to be submitting and proofing jobs online. As your needs expand and more clients are submitting and proofing jobs online, you can increase your capacity to accept more simultaneous online users.

Integrated PDF Option

Most users will submit PDF files, however, if you have clients who submit PostScript files, an integrated PDF Creator option may be added to PRINTERnet that will accept PostScript and create a Certified PDF automatically.

PRINTERnet Bundles

Xitron offers PRINTERnet as a bundled solution which includes a turnkey computer preloaded with PRINTERnet software. Training and installation is done onsite by a Xitron Support Specialist.

Annotating changes to an online proof with PRINTERnet.

Contact
