KEYSETTER

PRESSROOM WORKFLOW

KeySetter improves your pressroom efficiency by communicating ink coverage data directly to your press. This means you spend less time in make-ready and more time printing. Available as a direct connection to your press, or a console compatible data file, KeySetter reduces paper waste while increasing your profits.

KEYSETTER

KeySetter

KeySetter provides your pressroom with tools that reduce make-ready, cut waste and increase profitability. With an intuitive user interface bridging the gap between your prepress department and the pressroom, KeySetter can help automate your press console on a job-by-job basis.

KeySetter speaks your press' language. From CIP3 to proprietary formats - or even a direct connection to the console - efficient ink presetting is only a few clicks away. KeySetter can even provide a printed chart for older presses that have no automated capability.

Options

Your needs change as your business evolves. Your workflow should adapt accordingly. Whether this means integrating a web-to-print solution, refining your color proofing to the newest standards, or adding digital short-run systems that expand your market, productive Xitron workflow modules are available every step of the way.

Support Behind the Solution

Your investment in a Navigator workflow entitles you to the advice of individuals experienced in prepress operations and pressroom management. With service agreements that offer telephone, web, and email-based assistance, Xitron's support specialists are there to help with prepress theory, training, and troubleshooting.
