## KEYSETTER CONNECT AUTOMATIC INK KEY SETTING

### Benefits of KeySetter Connect

- Short learning curve – easy to operate
- Stores setting for job re-runs
- Intelligently learns from each print run
- Saves time, material and money

Xitron's KeySetter Connect integrates your prepress workflow with your press console, automatically calculating the proper ink key settings for each job and communicating them directly to the press. Make-ready time is significantly reduced and paper waste is cut by as much as two-thirds. More jobs can be produced in less time and pressroom labor savings result in an average payback of less than one year.

KeySetter Connect includes the hardware and software necessary for integration with one of the compatible presses listed. Installation is simple, and training can typically be accomplished in a single afternoon. This means that KeySetter Connect starts saving money right away.

## Compatible Presses

KeySetter Connect works with a number of presses and consoles including:

### Heidelberg

Sheet and web press from 2007 and earlier with CPC 1.02, 1.03 and 1.04 console

CP 2000 console

### ManRoland

Presses with console equipped with chip card reader

### KBA

Presses with a console equipped with 1.4 MB diskette drive using COL or GRO format

### Komori

Sheet or web press with both a magnetic tape drive and a diskette drive. (*Access to original tape drive is lost.*)
