Xitron Launches Navigator Flexo Suite for Labels at Labelexpo Americas

Ann Arbor, MI, USA August 23, 2022 – Xitron, a subsidiary of Hybrid Software Group and the developer of Harlequin-based Navigator RIP and workflow products for litho, flexo, screen, digital, and high-speed inkjet printing will debut an exciting new product at the upcoming Labelexpo Americas beginning September 13th in Rosemont, IL. Xitron will be exhibiting under the Hybrid Software Group banner in booth 3015.

On display for end users will be Xitron's new ***Navigator Flexo Suite: Label***, designed as a powerful workflow for flexo label printers who have outgrown basic RIPs and need more automation. Comprised of Harlequin™, the fastest RIP on the market, plus Mac & PC client access, hybrid screening, advanced and automated step & repeat functionality, and the most robust trapping tools in the industry, the workflow rivals established systems with much higher prices.

"***Navigator Flexo Suite: Label*** is uniquely positioned in terms of price and performance," says Karen Crews, President of Xitron. "Whether you're looking to replace an older system with high maintenance and upgrade costs or bringing platemaking in-house with one of the newer flexo CTP engines that are now widely available, ***Flexo Suite: Label*** has the ideal feature set for narrow web label production."

"Two of the standout features in this product are the vector-based trapping module and the easy-to-use step and repeat functionality built into the workflow, which were delivered in partnership with our sister company HYBRID Software" adds Eric Nelsen, Vice President of Product Development. These allow the operator to submit jobs quickly and efficiently into the system, apply the requisite trap settings to the PDF, configure step-and-repeat, add marks, and output press-ready plates. Most importantly, instead of relying on a single seat license that limits this functionality to one operator, ***Flexo Suite: Label*** puts these tools in the hands of each operator through the Mac & PC compatible Client interface."

The worldwide launch of **Navigator Flexo Suite: Label** will take place at Labelexpo Americas in booth 3015 where Xitron will be exhibiting along with four other Hybrid Software Group companies; Global Graphics Software, Hybrid Software, Meteor Inkjet, and ICD3.

About Xitron

Xitron develops advanced workflow systems and interfaces to drive the prepress industry's most popular new, and legacy output devices, prolonging our customers' investments. In addition, Xitron's Navigator Digital Front End is recognized as best in class by several digital press manufacturers around the world. Xitron's Navigator RIP, Raster Blaster TIFF Catcher, and Sierra Workflow solutions are recognized as prepress standards. Built around the Harlequin RIP core technology from Global Graphics and the Adobe PDF Print Engine from Adobe Systems, Xitron engineers continue to develop solutions for the graphic arts market, driving hundreds of different models of imagesetters, proofers, platesetters, inkjet printers, and digital presses. With shipments of more than 40,000 RIPs, Xitron is the largest independent Harlequin RIP developer in the market and is a subsidiary of Hybrid Software Group.
