### Xitron Launches Navigator Northstar

---

#### *RIP and workflow for inkjet printers using Memjet Northstar print heads*

**Ann Arbor, Michigan – February 8, 2016** – Xitron, the leading independent developer of RIP and workflow products for commercial, digital, and high-speed inkjet printing has released Navigator Northstar for sale through their extensive worldwide dealer network. Navigator Northstar improves the color accuracy of **Astrojet M1/M2** printers as well as the **ColorDyne 1600 (C & S)**, **RTI-Digital Vortex 850/851**, **Trojan One**, and **Formax Colormax** (among others), all of which use the **Memjet Northstar** inkjet head. A complete list of compatible Memjet-based printers can be found at <http://www.xitron.com/products/navigator-northstar>.

“Digital printing doesn’t have to equate to a lack of color control,” said Jeffrey Piestrak, Product Manager. “The color adjustment tools built into this workflow make it extremely easy to match a job’s spot colors without impacting the rest of the document.” Users adapt quickly to the intuitive interface, which guides the operator through the process. The result is a near immediate increase in productivity with the color accuracy people are looking for.

Piestrak added, “By combining the power of the Navigator Harlequin RIP with Xitron’s color transform technology, what you see is what you print, consistently.” Designed for the desktop envelope, flyer, and label market, Navigator Northstar includes Navigator RIP version 10.1r2, Navigator Color Matching Workflow, and the Northstar connectivity plug-in developed by Xitron. The system is multi-platform compatible and accessible from anywhere on a user’s network.

Navigator Northstar is shipping now, available through Xitron dealers worldwide. Printers interested in locating a Xitron dealer can visit <http://xitron.com/northstardealer>.

**About Xitron**

Xitron develops advanced workflow systems and interfaces to drive the prepress industry's most popular new, and legacy output devices, prolonging our customers' investments. In addition, Xitron's pressroom workflow solutions extend the functionality of press consoles from a number of industry leading press manufacturers. Xitron's Navigator RIP, Raster Blaster TIFF Catcher, and Sierra Workflow solutions are recognized as prepress standards. Built around the Harlequin RIP core technology from Global Graphics and the Adobe PDF Print Engine from Adobe Systems, Xitron engineers continue to develop solutions for the graphic arts market, driving hundreds of different models of imagesetters, proofers, platesetters, inkjet printers, and digital presses. With shipments of more than 30,000 RIPs, Xitron is the largest independent provider in the market. For more information about Xitron, visit us at [www.xitron.com](http://www.xitron.com).
